MEMORANDUM FOR THE CHAIRMAN, PRESIDENT'S FOREIGN
INTELLIGENCE ADVISORY BOARD

SUBJECT: The Watch Committee of the United States Intelligence
Board and the National Indications Center

1. In response to your suggestion of earlier this year, I have, with the assistance of the members of the United States Intelligence Board, completed a review of the functions and operation of the Watch Committee, USIB, and its National Indications Center (NIC) to determine what actions should be taken to improve the effectiveness of those groups to carry out their early warning mission. Our general findings and conclusions with respect to this aspect of the warning problem are contained in the attached report (Tab A) which was prepared by a select study committee of Intelligence Board members and approved by the USIB at a recent meeting.

4. I regard the early warning problem as of the highest importance and the most critical responsibility of the entire U. S. intelligence community. On that premise and on the basis of the attached report I have initiated the following actions to improve and provide support to the Watch Committee and National Indications Center, so that those groups may effectively discharge their responsibilities for continuous surveillance of indications of hostile Soviet intentions:

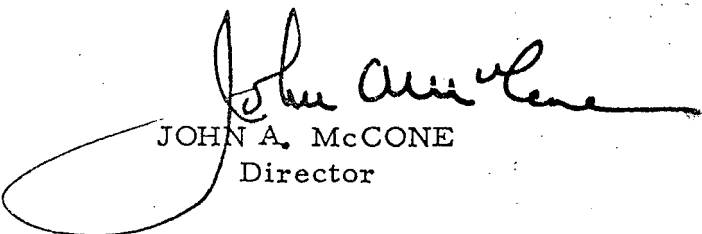

a. Designated the Deputy Director of Central Intelligence as Chairman of the Watch Committee, USIB, and urged that the representatives of Intelligence Board agencies on that Committee be maintained at a high level.

b. Requested that consideration be given to changing the name of the NIC to avoid any implication that the NIC is engaged in operational or tactical warning alert missions.

c. Directed that arrangements be made to augment the personnel strength of the NIC.

d. Requested that arrangements be made to establish a formal link between the NIC and the Defense Intelligence Agency Current Intelligence Indications Center.

e. Proposed an overall review of the status of implementation of the recommendations in the Warning Systems Survey Report as approved by USIB on 21 March 1961.
